ZONING YOUR FARM

Free workshop

Do you want to learn more about zoning your farm to improve biosecurity?

A zoned farm is not only better prepared for Panama TR4, it is critical to trading with the disease. This workshop will further your knowledge about this simple, cost-effective system and demonstrate how it can work for your property.

The Details

The Silkwood Hotel
Thursday 8 November, 4-6pm

Snacks will be provided and meals can be purchased from the venue.

RSVP essential to have your farm map available.

RSVP

Online: cutt.ly/zoningTR4

Phone: 07 4091 8140

Email: panamatr4@daf.qld.gov.au

*What
you will
learn*

*Why
zoning is critical
to keep trading
with Panama TR4*

*How
to zone your farm,
working with
maps of your own
property*

Why should you attend?

Zoning is important to protect your farm. No-one knows where the disease will turn up next so it's best to be prepared. Allocate these 2 hours to work on your zoning plan with the help of Agri-Science Queensland, the ABGC and Biosecurity Queensland.
